

文章 ID	文章题目	Track Name
44	A Load Balancing Mechanism for a Multi-Controller Software Defined WiFi Network	34-Mobile, Wireless and Sensors Networking
118	Trusted digital asset copyright confirmation and transaction mechanism based on consortium blockchain	61-Next Generation Technology of Information Security and Information Processing
1421	Deep Learning Models for Intelligent Healthcare: Implementation and Challenges	20-Artificial Intelligence Security
1625	4. Demonstration of Low Power and Low Cost Wireless Sensor Network with Edge Computing	71-Multimedia Watermarking and Privacy Protection in Cloud Computing
1818	On-chain and Off-chain Collaborative Management System Based on Consortium	61-Next Generation Technology of Information Security and Information
1910	CCTL: Cascade Classifier Text Localization Algorithm In Natural Scene Image	33-IoT and Future Communication Technologies
1963	Research on Cultivating Senior Technical Talents Based on the Internet of Things	04-IoT Security
2076	A Multi-scale Fusion Method For Dense Crowd Counting	40-Cyber Security with Big Data
2144		21-Artificial Intelligence Applications in Emerging Engineering Fields
2188	A Fuzzy Predictive Train Tracking Control Method Based on Hierarchical Control	34-Mobile, Wireless and Sensors Networking
2189		21-Artificial Intelligence Applications in Emerging Engineering Fields
2237		21-Artificial Intelligence Applications in Emerging Engineering Fields
2361	Optimization of Location Technology in Meteorological Wireless Sensor Network	11-Big Data and Data Analysis
2410	2410-Software Information Hiding Algorithm Based on Import Table of Portable Executable File)	56-Multimedia Intelligence and Security
2445	Research and Application of Holographic Portrait Label System Construction for Main Equipment of Distribution Network Based on Big Data	37-Precise Task Control in Teleoperation
2446	Research on Prediction Algorithm for Heavy Overload of Main Equipment in Distribution Network	37-Precise Task Control in Teleoperation
2505		21-Artificial Intelligence Applications in Emerging Engineering Fields
2513	WSN coverage Path optimization based on BBO algorithm	04-IoT Security
2570	2570: A Practical Blockchain Framework for Securing IoT Applications	40-Cyber Security with Big Data
2660	HNN-based Prediction Method Supporting Discovery of Production Abnormal	42-Emerging Technologies for Cyber Attack and Defense Confrontation
2705	Detection of false data injection attacks in Smart Grid based on Machine Learning	42-Emerging Technologies for Cyber Attack and Defense Confrontation
2737	research on Electricity Consumption Prediction Based on K-means Clustering Federated Learning	37-Precise Task Control in Teleoperation
2738	A Homomorphic Encryption Method for Power Data based on Improved Pailliar Algorithm	37-Precise Task Control in Teleoperation
2763	Control system design of transport Robot based on Multi-color Recognition	37-Precise Task Control in Teleoperation
2771	A Method of Network Attack Recognition Based on the CNN+LSTM Model	71-Multimedia Watermarking and Privacy Protection in Cloud Computing
