

## ICAIS 2022 CALL FOR WORKSHOP/SESSION PROPOSALS

<http://www.icaisonf.com/>

The 8th International Conference on Artificial Intelligence and Security (ICAIS 2022), will be held in Qinghai, China, in July 2022. Over the past seven years, ICAIS has become a leading conference on artificial intelligence and security, garnering comprehensive coverage in July 2019 by Reuters and in June 2018 by CCTV 4 China News. ICAIS is a highly selective and premier international forum on computer science and engineering research. In addition to the main sessions, the conference will include workshops, panels, demonstrations, and exhibits. The organizing committee is excited to invite you to take part in ICAIS 2022, to discuss issues at the technological frontier of society today as well as interdisciplinary technological trends.

We invite proposals for workshops that will provide forums for researchers, engineers and scientists from all communities (academia, industry, standards organizations) to present their latest research findings, novel ideas, and valuable comments in specific areas of interests.

### Topics

Workshop topics are encouraged, but not limited, to cover some emerging focused areas related to the overall conference scope: artificial intelligence, cloud computing, IoT, big data, information hiding, watermarking, digital forensics, cryptography, ciphertext retrieval, block chain and so on.

### Benefits of Accepted Workshop Proposal

- Provide same benefits with the main conference;
- Accepted outstanding papers could be recommended to be published in SCI indexed journals;
- Accepted regular papers could be published on LNCS (EI indexed);
- Accepted short papers could be published on international academic journals.

### Submission Guidelines

All submissions should be submitted in English containing the following sections:

- Title;
- Abstract: 200 word summary of the workshop purpose;
- Topics: What topics of interest will be covered by the workshop;
- Chair(s): Name, affiliation, email address, homepage and short (one paragraph) biography of each chair (at least one member of chairs comes from oversea);
- Program Committee: Names and affiliations of potential PC members.

### Review Criteria

The decision on acceptance or rejection of a workshop proposal will be made on the basis of the overall quality of the proposal and its appeal to a reasonable fraction of the artificial intelligence, cloud computing, and cyber security community. Other factors, such as overlap with other workshop proposals, or the number of attendances, will also be taken into account when making the final decision.

The workshop organizer(s) will be responsible for promoting the workshops in communities and moderating the workshop.

### Important Dates

Workshop proposals due: [August 12, 2021](#)

Notification of accepted proposals: [August 19, 2021](#)
